

January 11, 1963

Dear Tracy:

Thank you for your note of the 2d. I would hate to burden you with trying to translate my tendentious prose, but there is of course no reason why you should not make your own statement and critique of the issues I raised.

So, I propose the following:

1. I have drafted the enclosed paraphrase of the symposium article, and have submitted it to Nature; its publication in such an accessible forum should relieve me of having to go over the same ground repeatedly.
2. Please follow your own judgment in copying or distributing either version. (No copies have been sent to your list so far.)
3. Ditto. with respect to the republication of either version (the Nature one probably more suitable), for which I will of course cooperate in requesting permission from the copyright-holder.

Sincerely,

Jodhua Lederberg
